

Parsimony Scores

Contents

1. Introduction ggtree
2. Loading and reviewing tree data
3. Plotting for data exploration
 - Importing datasets
 - Discrete plots
 - Layers
 - Color vs. Fill
 - Univariate plots
 - Plot themes
 - Facets
 - Saving plots
4. Bonus
 - Creating complex plots
 - Animated plots
 - Map plots
5. Glossary of terms

Bonus: why learn to program?

Share why you're interested in learning how to code. > ## Solution: > There are lots of different reasons, including to perform data analysis and generate figures. I'm sure you have more specific reasons for why you'd like to learn! {: .solution} {: .challenge}

Challenge: Can you do it? What is the output of this command?

```
paste("This", "new", "template", "looks", "good")
```

```
{: .language-r}
```

Solution

```
[1] "This new template looks good"
```

```
{: .output} {: .solution} {: .challenge}
```

```
for thing in collection:
  do_something
```

```
{: .source}
```
